

The Cloud Management Platform That Powers HPE GreenLake

Quickly turn VMware, Nutanix, Microsoft, and other on-prem infrastructure into easy to consume self-service private clouds while extending control over AWS, Azure, GCP, and other public clouds with unified governance and cost optimization.

“By 2025, 75% of platform teams will provide self-service developer portals to improve developer experience and accelerate innovation.” - Gartner

Moving faster than the competition is critical, but unfortunately, managing on-prem hypervisors, public clouds, container platforms, and infrastructure automation tools can be a lot to take on for IT teams facing major skills gaps.

Morpheus is a unified platform born to simplify the consumption of hybrid clouds, container clusters, and infrastructure automation tools via self-service.

- For **IT Ops**, we fully automate end-to-end server builds, streamline app provisioning, and simplify day-2 activities.
- For **Security**, we map ID providers, enforce policy, assure golden template use, and automate security scans.
- For **Developers**, we enable provisioning of app environments on-demand via GUI, API, or IaC within CI/CD pipelines
- For **Finance**, we provide visibility, invoice consolidation, and cost optimization plus reporting and analytics for showback.
- For **MSPs**, we provide a secure multi-tenant portal and metering for private, public, and managed cloud brokering.

Named a Leader by Gartner and Forrester, Morpheus has the best customer reviews in the field. Why?

- **Deploy in hours, not months:** Quickly unify existing tools with codeless integrations into 80+ 3rd-party technologies.
- **100 agnostic for zero lock-in:** Orchestrate VMware, Red Hat, HashiCorp, AWS, Azure, etc. plus easily swap tools or clouds.
- **Reduce tool sprawl and complexity:** Skip the VMware vRealize Automation pain and avoid brittle DIY scripting.

**Hewlett Packard
Enterprise**

Unified cross-cloud control for hypervisors, container clusters, and public clouds

- **PRIVATE:** VMware, Nutanix, Microsoft, Kubernetes, KVM, OpenStack, Bare Metal, ++
- **PUBLIC:** Amazon, Azure, GCP, Oracle, IBM, Alibaba, DigitalOcean, ++

Codeless integrations to orchestrate existing tools and mitigate skills gaps

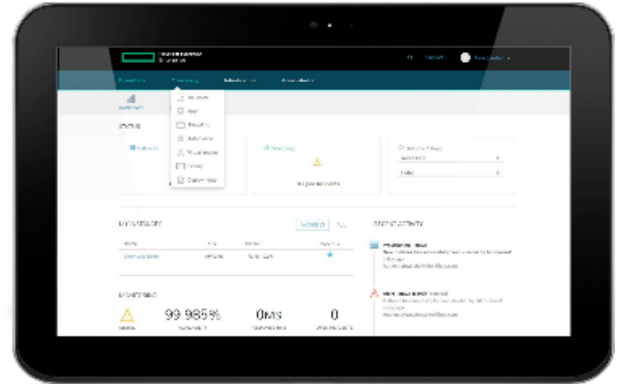

- **TRIGGER:** GUI, API/CLI, IaC, ServiceNow, Jenkins, ++
- **CONTROL:** Active Directory, Okta, SAML, OneLogin, ++
- **PROVISION:** Terraform, ARM, CloudFormation, HELM, ++
- **CONNECT:** NSX-T, Infoblox, BlueCat, SolarWinds, ACI, ++
- **CONFIGURE:** Ansible, Chef, SaltStack, Puppet, vRO, ++
- **OPERATE:** Rubrik, Zerto, Veeam, AppD, Splunk, ++
- **SCALE:** F5, Citrix, NSX, A10, ALB, ELB, Scale Sets, ++

Endless possibilities with an extensible architecture and flexible plugin framework.

Self-service is a defining factor of Hybrid Cloud, DevOps... and Morpheus

Designed by real-world practitioners in digital transformation projects, Morpheus is the self-service engine powering hundreds of enterprise and service provider teams around the globe.

- **Clouds:** Instantly provision any workload into any cloud for VMaaS, DBaaS, PaaS, or Apps on-demand without waiting on IT.
- **Containers:** Build, manage, and use K8s in any cloud; deploy MKS, AKS, EKS, GKE or brownfield Ezmeral, OpenShift, Rancher, ++.
- **Automation:** Execute phase-based, ad-hoc, or scheduled workflows using any mix of Terraform, Ansible, Chef, Bash, vRO, ++.
- **Services:** Discover, map, monitor, and optimize workloads across hybrid infrastructure with analytics and 3rd-party extensibility.

How can you work with HPE and Morpheus to enable hybrid cloud?

Delivering a simple self-service provisioning experience for private and hybrid cloud is easier with HPE and Morpheus.

- **Solutions:** Morpheus is used by HPE GreenLake Managed Private and Hybrid Cloud Services for VMaaS and more.
- **Services:** HPE Advisory and Professional Services teams are certified to deploy and customize Morpheus installations.
- **Products:** Morpheus software licenses available via HPE and Partners plus can be included in HPE GreenLake contracts.
