The Fastest Way to Turn VMware Into a True Private/Hybrid Cloud

Quickly turn VMware, Nutanix, Microsoft, and other on-prem infrastructure into easy to consume self-service private clouds while extending control over AWS, Azure, GCP, and other public clouds with unified governance and cost optimization.

MORPHEUS

vmware®

"By 2025, 75% of platform teams will provide self-service developer portals to improve developer experience and accelerate innovation." - Gartner

Moving faster than the competition is critical, but unfortunately, managing on-prem hypervisors, public clouds, container platforms, and infrastructure automation tools can be a lot to take on for IT teams facing major skills gaps.

Morpheus is a unified platform born to simplify the consumption of hybrid clouds, container clusters, and infrastructure automation tools via self-service.

- For **IT Ops**, we fully automate end-to-end server builds, streamline app provisioning, and simplify day-2 activities.

- For **Security**, we map ID providers, enforce policy, assure golden template use, scan CVEs, and manage credentials.

- For **Developers**, we enable provisioning of app environments on-demand via GUI, API, or IaC within CI/CD pipelines

- For **Finance**, we provide visibility, invoice consolidation, and cost optimization plus reporting and analytics for showback.

- For **MSPs,** we provide a secure multi-tenant portal and metering for private, public, and managed cloud brokering.

Named a Leader by Gartner and Forrester, Morpheus has the best customer reviews in the field. Why?

- **Deploy in hours, not months**: Quickly unify existing tools with codeless integrations into 80+ 3rd-party technologies.

- **100 agnostic for zero lock-in:** Orchestrate VMware, Red Hat, HashiCorp, AWS, Azure, etc. plus easily swap tools or clouds.

- **Reduce tool complexity**: Skip the VMware vRealize Automation and Aria pain plus avoid brittle DIY scripting.

Unified cross-cloud control for hypervisors, container clusters, and public clouds

- **PRIVATE:** VMware, Nutanix, Microsoft, Kubernetes, KVM, OpenStack, Bare Metal, ++

- **PUBLIC:** Amazon, Azure, GCP, Oracle, IBM, Alibaba, DigitalOcean, ++
Worried about Broadcom?
Unlock private and hybrid cloud

- **WE HAVE YOUR BACK**
 vRA/Aria may suffer but Morpheus is 100% focused on your hybrid cloud success.

- **WE SAVE YOU MONEY**
Eliminate waste in your ELA plus reduce the time and money spent on automation

- **WE LOVE VMWARE**
1M VMs under management and leading integration with vSphere, NSX, vCD, etc.

- **WE GIVE YOU OPTIONS**
Provision as easily into other hypervisors and clouds as you do into VMware to get chioce

Self-service is a defining factor of Hybrid Cloud, DevOps... and Morpheus

Designed by real-world practitioners for their own use, Morpheus is the self-service platform operations engine powering hundreds of teams and 1M+ VMs worldwide.

- **Clouds:** Instantly provision any workload into any cloud for VMaaS, DBaaS, PaaS, or Apps on-demand without waiting on IT.

- **Containers:** Build, manage, and use K8s in any cloud; deploy Morpheus K8s, AKS, EKS, GKE or connect to existing OpenShift, Rancher, ++.

- **Automation:** Execute phase-based, ad-hoc, or scheduled workflows using any mix of Terraform, Ansible, Chef, Bash, Python, vRO, ++.

- **Services:** Discover, map, monitor, and optimize workloads across hybrid infrastructure with analytics and 3rd-party extensibility via plugins.

Codeless integrations to orchestrate existing tools and mitigate skills gaps

- **TRIGGER:** GUI, API/CLI, IaC, ServiceNow, Jenkins, ++

- **CONTROL:** Active Directory, Okta, SAML, OneLogin, ++

- **PROVISION:** Terraform, ARM, CloudFormation, HELM, ++

- **CONNECT:** NSX-T, Infoblox, BlueCat, SolarWinds, ACI, ++

- **CONFIGURE:** Ansible, Chef, Salt, Puppet, vRO, ++

- **OPERATE:** Rubrik, Zerto, Veeam, DataDog, Splunk, ++

- **SCALE:** F5, Citrix, NSX, A10, ALB, ELB, Scale Sets, ++

Avoid the cost, complexity, and lock-in of vRA/Aria.

Enable next-generation hybrid cloud platform operations.

Leverage best-in-class VMware integration but give yourself options.

- vSphere / ESXi

- VMC on AWS, Azure, GCP

- vCloud Director for MSPs

- VMW Integrated OpenStack,

- VMware NSX-V and NSX-T

- vRealize Orchestrator (vRO)
